

4 Courses

Recommendation Engine - Basics

Project on Recommendation Engine - Book Recommender

Project on Recommendation Engine - Advanced Book Recommender

Develop a Movie Recommendation Engine

May 21, 2026

Tasneem Ibrahim Hassan Mohamed Taha

has successfully completed the online Specialization

Mastering Recommendation Systems with Python

This Specialization equips learners with practical skills to design and implement robust recommendation systems using Python. Spanning foundational techniques to hybrid models, it covers collaborative filtering, content-based filtering, and real-world deployment strategies using libraries like Surprise, Pandas, and Scikit-learn. Learners will explore use cases like movie and book recommenders, applying best practices from real-world platforms.

EDUCBA

Data Science Instructor and Recommendation Systems Specialist

This certificate attests to the learner's completion of an online program delivered via Coursera. It does not constitute formal enrollment at any university or entity and does not itself grant academic credit, grades, or a degree. Institutions or organizations may, at their discretion, recognize this learning toward their own programs or credentials.
